4.2 Cycle Parking Spaces

Proposed cycle spaces outside the application boundary within 35m travel distance: 442

4.2 Cycle Parking Spaces
Summary

Existing cycle parking bays within the application boundary	Proposed cycle parking spaces within application boundary	Net Change
186	110	-76

Existing cycle parking bays within 35m travel distance of the application boundary	Proposed cycle parking bays within 35m travel distance of the application boundary	Net Change
366	442	+76

Existing combined total	Proposed combined total	Net Change
552	552	0

Conclusion

There is a net reduction in the number of cycle parking spaces within the application boundary.

There is a net increase in the number of cycle parking spaces beyond the application boundary.

Cycle stands outside the application boundary are proposed to be enhanced to meet current Cambridge City Council standards.

Overall there would be 552 cycle parking spaces accessible within the application boundary and 35 metre travel distance. This is no change in overall cycle numbers.

There are currently no designated cargo bike parking stands within the application boundary or the public realm within 35 metres travel distance. The proposals include 12 cargo bike spaces.

There will be a higher number of parking spaces available to people within 35m of the application boundary. These will be of a higher standard and provide facilities for more diverse bicycle types.

4.6 Character Areas - Market

Security

In response to concerns about anti-social behaviour in Market Square, the proposals include integrated security gates, enhanced lighting and expanded CCTV coverage, as outlined below.

Security Gates ●

- Four security gates are located in the market's central core between stalls 10–13, 12–20, 17–27 and 24–32. They are proposed to provide enhanced security for the central area and protect access to the basement stair.
- The metal gates will be mounted to independent, free-standing posts (separate from the stalls) and finished to colour-match. Each gate will also include an engraved historic depiction of Market Square.
- The gates will be locked each evening to deter anti-social behaviour on Market Square.

Lighting ① ② ③ ④

- 1. Column mounted, warm street flood lighting provides required light levels to roadways and the public realm.
- 2. Lighting mounted to the fixed market stalls is functional and promotes their commercial offer.
- 3. Uplighting trees helps add value to the public space
- 4. Lighting to the fountain and the surrounding public space (incorporated into parasols and planters) provides a focal point and social space.

Precedent light fittings can be viewed on the following page

CCTV ●

- Security CCTV coverage will supplement natural surveillance across the Market Square and public realm.
- Indicatively CCTV will be located at high level on lighting columns, Fixed Market Stalls and potentially the Guildhall.
- Discussions with the CCTV technical team at Huntingdonshire District Council are underway and the detailed design and coordination with the existing network is being developed.

4.6 Character Areas - Market

Security - Lighting

Example Type 1 - Column mounted warm street lighting

Example Type 2 - Wall mounted stall light
